

HORIZON DIAGNOSTICS AND ONCOLOGY REFERENCE LAB

14, MG Road, Pune, Maharashtra 411001 | Ph: 020-4XXX-XXXX
NABL Accredited Laboratory | Report Generated Electronically

Patient Name: Sunita Deshmukh Age / Sex: 52 Y / Female
Patient ID: HDO-2026-011893 Referring Doctor: Self / Walk-in
Collection Date: 18-Jul-2026 09:05 AM Report Date: 18-Jul-2026 04:20 PM
Sample Type: Venous Blood (EDTA / Serum) Report Status: Final

Summary of Findings

The following results are reported in narrative form rather than a tabular layout, as per the referring physician's request for a consolidated summary alongside routine haematology and tumour marker panels.

Haematology

Haemoglobin was measured at 8.9 g/dL, which is Low against the reference range of 12.0 to 15.5 g/dL. Total WBC Count came back at 3,200 per cumm, which is Low against the reference range of 4,000 to 11,000 per cumm. Platelet Count was found to be 98,000 per cumm, which is Low against the reference range of 1.5 to 4.1 lakh per cumm. Erythrocyte Sedimentation Rate (ESR) was markedly elevated at 62 mm/hr, flagged High against a reference range of less than 20 mm/hr.

Tumour Markers and Biochemistry

CA-125 was measured at 210 U/mL, flagged High against a reference range of less than 35 U/mL. Lactate Dehydrogenase (LDH) was recorded at 410 U/L, flagged High against a reference range of 140 to 280 U/L. Serum Albumin was found to be low at 2.9 g/dL against a reference range of 3.5 to 5.0 g/dL.

Clinical Notes

Patient reports unintentional weight loss of approximately 6 kg over the past two months, persistent lower abdominal discomfort, and early satiety when eating. No fever or infective symptoms reported at the time of collection.

Interpretation of these results should be done in correlation with clinical findings by a qualified physician. This report is not a substitute for professional medical diagnosis. Values may vary between laboratories due to differences in methodology.
